EastGroup Properties, Inc. (NYSE: EGP) announced today the results of its operations for the three and nine months ended September 30, 2015.

Commenting on EastGroup's performance, David H. Hoster II, CEO, stated, "EastGroup continued its strong momentum of growth in funds from operations per share in the third quarter achieving a 5.6% increase in FFO per share as compared to the same quarter last year. These results continued our track record of increases in FFO per share as compared to the prior year's quarter in seventeen of the last eighteen quarters.

"Quarter-end occupancy of 95.8% was our ninth consecutive quarter of 95% or above which basically represents stabilized full occupancy for a multi-tenant property industrial company. This occupancy and positive rent spreads generated positive same property net operating income growth with and without straight-line rent adjustments. We believe these results reflect the quality and strategic locations of our properties in the major sunbelt growth markets.

"From an investment standpoint, we started two new developments in the third quarter and plan to begin several more before the end of the year. Also, we are under contract to sell a 232,000 square foot, older asset in Houston. Our plans are to increase our rate of dispositions and to reduce our exposure to that market."

DIVIDENDS

EastGroup increased its quarterly common stock dividend 5.3% to \$.60 per share in the third quarter of 2015. This was the Company's 143rd consecutive quarterly cash distribution. EastGroup has increased or maintained its dividend for 23 consecutive years and increased it 20 years during that period. It has also increased the dividend in each of the last four years. The Company's payout ratio of dividends to FFO was 64% for the third quarter. The annualized dividend rate of \$2.40 per share yielded 4.3% on the closing stock price of \$56.35 on October 14, 2015.

FINANCIAL STRENGTH AND FLEXIBILITY

EastGroup continues to maintain a strong and flexible balance sheet. Debt-to-total market capitalization was 35.8% at September 30, 2015. For the third quarter, the Company had both interest and fixed charge coverage ratios of 4.6x and a debt to earnings before interest, taxes, depreciation and amortization (EBITDA) ratio of 6.30x.

Total debt at September 30, 2015 was \$978.9 million comprised of \$455.0 million of unsecured debt, \$380.7 million of secured debt, and \$143.2 million of unsecured bank credit facilities.

As previously disclosed, EastGroup negotiated terms to amend its \$225 million and \$25 million unsecured bank credit facilities in July. The Company closed on the amended credit facilities on July 30, 2015; the amended agreements expand the facilities to \$300 million and \$35 million, reduce the current applicable margins over LIBOR from 117.5 basis points to 100 basis points, reduce the current applicable facility fees from 22.5 basis points to 20 basis points, and extend the maturity dates from January 5, 2017 to July 30, 2019. The \$300 million agreement contains an option for a one-year extension (at the Company's election) and a \$150 million expansion (with agreement by both parties). The \$35 million agreement contains a provision that the credit facility would automatically be extended for one year if the extension option in the \$300 million facility is exercised.

Subsequent to quarter-end, EastGroup issued \$75 million of senior unsecured private placement notes with two insurance companies. The 10-year notes have a weighted average interest rate of 3.98% with semi-annual interest payments. The notes will not be and have not been registered under the Securities Act of 1933, as amended, and may not be offered or sold in the United States absent registration or an applicable exemption from the registration requirements.

During the third quarter of 2015, EastGroup issued and sold 105,063 shares of common stock under its continuous equity program at an average price of \$60.20 per share with net proceeds to the Company of \$6.2 million.

DEFINITIONS

The Company's chief decision makers use two primary measures of operating results in making decisions: (1) property net operating income (PNOI), defined as *Income from real estate operations less Expenses from real estate operations* (including market-based internal management fee expense) plus the Company's share of income and property operating expenses from its less-than-wholly-owned real estate investments, and (2) funds from operations attributable to common stockholders (FFO). EastGroup defines FFO consistent with the National Association of Real Estate Investment Trusts' definition, as net income (loss) attributable to common stockholders computed in accordance with U.S. generally accepted accounting principles (GAAP), excluding gains or losses from sales of depreciable real estate property and impairment losses, plus real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures.

PNOI and FFO are supplemental industry reporting measurements used to evaluate the performance of the Company's investments in real estate assets and its operating results. The Company believes that the exclusion of depreciation and amortization in the industry's calculations of PNOI and FFO provides supplemental indicators of the properties' performance since real estate values have historically risen or fallen with market conditions. PNOI and FFO as calculated by the Company may not be comparable to similarly titled but differently calculated measures for other REITs. Investors should be aware that items excluded from or added back to FFO are significant components in understanding and assessing the Company's financial performance.
