DEFINITIONS

The Company's chief decision makers use two primary measures of operating results in making decisions: (1) property net operating income (PNOI), defined as *Income from real estate operations* less *Expenses from real estate operations* (including market-based internal management fee expense) plus the Company's share of income and property operating expenses from its less-than-wholly-owned real estate investments, and (2) funds from operations attributable to common stockholders (FFO). EastGroup defines FFO consistent with the National Association of Real Estate Investment Trusts' definition, as net income (loss) attributable to common stockholders computed in accordance with U.S. generally accepted accounting principles (GAAP), excluding gains and losses from sales of depreciable real estate property and impairment losses, adjusted for real estate related depreciation and amortization, and after adjustments for unconsolidated partnerships and joint ventures.

PNOI and FFO are supplemental industry reporting measurements used to evaluate the performance of the Company's investments in real estate assets and its operating results. The Company believes that the exclusion of depreciation and amortization in the industry's calculations of PNOI and FFO provides supplemental indicators of the properties' performance since real estate values have historically risen or fallen with market conditions. PNOI and FFO as calculated by the Company may not be comparable to similarly titled but differently calculated measures for other REITs. Investors should be aware that items excluded from or added back to FFO are significant components in understanding and assessing the Company's financial performance.

EastGroup sometimes refers to PNOI from Same Properties as "Same PNOI" in this press release and the accompanying reconciliation. Same Properties is defined as operating properties owned during the entire current period and prior year reporting period. Properties developed or acquired are excluded until held in the operating portfolio for both the current and prior year reporting periods. Properties sold during the current or prior year reporting periods are excluded.

The Company's chief decision makers use Earnings Before Interest, Taxes, Depreciation and Amortization for Real Estate (EBITDAre) in making decisions. EBITDAre is defined as Net Income, adjusted for gains and losses from sales of depreciable real estate property, interest expense, income tax expense, depreciation and amortization. EBITDAre is a non-GAAP financial measure used to measure the Company's operating performance and its ability to meet interest payment obligations and pay quarterly stock dividends on an unleveraged basis.

EastGroup's chief decision makers also use its Debt-to-EBITDAre ratio, a non-GAAP financial measure calculated by dividing the Company's debt by its EBITDAre, in analyzing the financial condition and operating performance of the Company relative to its leverage.

The Company's interest and fixed charge coverage ratios are non-GAAP financial measures calculated by dividing the Company's EBITDAre by its interest expense. These ratios provide a basis for analysis of the Company's leverage, operating performance, and its ability to service the interest payments due on its debt.

In a press release dated January 17, 2018, the Company, along with a group of other leading industrial REITs

(the Industrial REIT Group), announced that the Industrial REIT Group has agreed on a consistent methodology to calculate various non-GAAP property operating metrics. These non-GAAP metrics include common methodologies for determining property stabilization and occupancy as well as reporting of comparative changes in rental rates and tenant retention rates. In addition, the Industrial REIT Group has agreed on the definition of the annual pool of properties (same property pool) used in calculating same property net operating income growth (same property NOI). Specifically, the annual same property pool will only include properties held as of the beginning of the prior calendar year which were stabilized (according to the agreed upon definition) throughout both periods presented.

Beginning in the first quarter of 2018, all members of the Industrial REIT Group agreed to calculate these non-GAAP metrics based on the agreed upon methodologies. These conforming changes do not have a material impact on EastGroup's non-GAAP metrics for periods prior to 2018. The actual results for 2018 and outlook for 2019 included in this earnings release are based on the revised methodologies.

As a result of the efforts of the Industrial REIT Group, EastGroup made the following conforming changes, effective January 1, 2018:

- The Company transfers development and value-add properties to the operating portfolio at the earlier of 90% occupancy or one year after shell completion/value-add vacancy occurrence. EastGroup's previous policy was to transfer properties at the earlier of 80% occupancy or one year after shell completion.
- The calculation of the Company's rental rate change no longer excludes leases for space which has been vacant for more than 24 months. All leases are now included, with the exception of short-term leases with terms less than 12 months and leases of first generation space in properties acquired or developed by EastGroup.
- The calculation of same property NOI on the cash basis excludes straight-line rent adjustments and amortization of above/below market rent intangibles. In prior periods, EastGroup included the amortization of above/below market rent intangibles in its calculation of same property NOI on the cash basis.
